

WORK EXPERIENCE

Bank Of Singapore (2021 – Current) **Backend Engineer (Legacy system)**

- Fixed bugs using MS SQL, involving learning SQL and MyBatis to effectively troubleshoot and resolve issues.
- Pioneered the use of Java microservice with JPA, improving the efficiency and reliability of the system.

Backend Engineer (New system)

- Created 5 microservices with a team of 2, playing a key role in the development and implementation of a system used by multiple downstream and critical components.

Automated Performance Testing

- Developed an organization wide automated performance testing process for microservices, utilizing Jenkins, Cucumber, and Apache Bench to streamline testing and enhance overall system performance.
- Documented the process, which has since been adopted by other teams within the bank.
